APPRENTICESHIP VACANCY

Vacancy: Level 3 – Machining - Technician

Vacancy Ref. Number: SP009

Employer Name: Broadway Engineering

Location: Bristol

About the Employer

Established in 1938, Broadway started with humble beginnings, manufacturing a variety of components to support the war efforts.

As the war came to an end, Broadway gained traction in the Aerospace market and established itself as a reputable Aerospace manufacturer. Since then, Broadway has continued to strengthen relationships with customers of all sizes, including several blue-chip organisations. Since then Broadway has stayed ahead of the curve, maintaining strong relationships with customers and providing a wide array of specialist manufacturing techniques.

Broadway has a dedicated NPI team that provides a dedicated engineering and manufacturing resource alongside an 'end to end' customer solution utilising Solid works, Mastercam, 3d printed prototypes and various in-house special processes.

As part of our 'End to End Customer Solution' approach we have developed valuable relationships with a vast array of material and special process houses. This has allowed us to ensure our competitiveness in providing strong lead times and pricing ...

These relationships have been developed over many years of working together and covers many different areas including: Castings, Forgings, Welding, Painting, Various coatings, NDT, and Heat Treatment.

Broadway Group was formed in 2021 to bring together leading aerospace manufacturing SMEs, including AVPE Systems and Broadway Engineering.

With comprehensive machining capabilities and the scale to support major projects, we support a diverse customer base spanning airframe, engine, civil, defence and aftermarket aerospace sectors.

Overview of Role

Role will encompass all aspects of Engineering from Turning, Milling & Inspection

Knowledge of engineering techniques

Health and Safety

Full Description

The CNC setter operator programmer is responsible for activities which influence the following Key Performance Indicators (KPI's):

- Involvement and attendance at SQDCP meetings in assigned area/s

If you aspire to riding and communicating with horses better, British Dressage apprenticeship is for you.

to discover Dressage!

British Dressage is the governing body for the Olympic sport of Dressage and the Paralympic sport of Para-dressage. Each year we select teams to represent Great Britain at championships as part of Team GBR at senior, para, young rider, junior and pony levels.

In the session we will cover:

- An introduction to British Dressage.
- British Dressage Apprenticeships.
- Understanding and supporting career opportunities within equestrian world.
- Insight into all the departments at BDHQ.
- Q & A with industry professionals.
- Guest speakers from across the business.

READY?

Virtual Insight Day

08/03/2024 9.00am - 13.00pm

Apply by 16th February

Age: 14-19

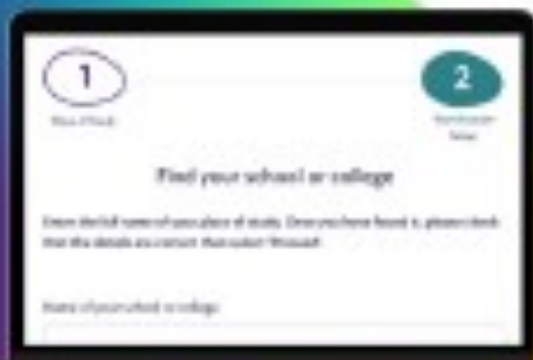

SPEAKERS
for schools

Speakers for Schools

Our new portal is LIVE!

Step 1: Register on the Experience Portal

- Click [HERE](#) to register as a young person on our portal.
- Select your school or college
- Fill out your personal details - ensure you note your career interests and previous experience

Step 2: Search for opportunities

Insight Days and VWEX are advertised on the portal under the 'Opportunities' tab.

You can:

1. Filter by industry/sector/interest
2. Search by name, company, location, sector
3. Search by age range

Please note that Discovery Workshops cannot be viewed or applied for via the portal. To search for our Discovery Workshop opportunities through our website [here](#).

SPORTS SCHOLARSHIPS

Bangor's Sports Scholarship scheme aims to recognise and support sporting excellence and achievement. The Scholarships, which are worth up to £3,000 a year, aren't limited to any particular sport or to students on any specific courses. However, in most cases, preference will be given to those individuals who will be able to represent Bangor University in the British University and Colleges Sport (BUCS) competitions.

To be eligible for consideration for a Sports Scholarship, you must:

- Be likely to achieve a podium, or points scoring position at the appropriate BUCS championship
- Be a European, Commonwealth or World level competitor in your chosen sport
- Not currently be competing in a sport or at a level that provides prize money.

To apply for the Sports Scholarship, UCAS applicants need to complete and return the application form by 31 March 2024. More information and link to the form on the website www.bangor.ac.uk/studentfinance/info/sportsscholarships

EXPERIENCE UNIVERSITY OF SOUTHAMPTON RESIDENTIAL

16–19 JULY 2024

Join us on campus for a **4-day, 3-night programme**. Giving you the opportunity to experience the **academic and social side** of university life. You'll be provided with **free accommodation and meals** for the duration of the residential.

You'll get to meet our enthusiastic team of Student Ambassadors studying the courses you are aspiring to, as well as academics, researchers and alumni. This residential is open to Year 12 or Level 3 (Year 1) students who meet our academic and **Widening Participation eligibility criteria** (see overleaf).

The 4 day programme will include:

- Access to a taster lecture and group workshop/practical in a degree programme/subject area
- Experience teaching and research within a subject area
- Receive information and guidance through a number of activity-based sessions within finance, budgeting and student life
- An alumni talk, to find out where our graduates ended up after they studied at UoS
- An opportunity to stay in student halls
- A chance to explore our campuses
- Social activities throughout the event to meet like-minded individuals and visit the city center

INSIGHT INTO UNIVERSITY

Thank you to our supporters:

HELP STUDENTS DECIDE WHETHER UNIVERSITY IS THE ROUTE FOR THEM

Insight into University is a comprehensive virtual experience allowing students to explore STEM studies at university and the career opportunities that these subjects lead to. It provides access to information on student life, STEM projects and activities set by leading UK universities and global STEM companies, first year undergraduate lectures, live interactive sessions with academics, admissions tutors, employers and current students.

Whether young people are interested in life sciences, chemistry, biomedical, forensic science, robotics, food science, electronics, engineering, physics, computer science, sustainability, materials science, aerospace, built environment, tech or maths, we have something for them. With specially developed content and live sessions from universities including University of Cambridge, Sheffield, Lancaster, Abertay, UCL, Oxford, Liverpool, Plymouth, Edinburgh, Birmingham, Warwick, Kingston, Nottingham, Strathclyde. We will also have some fantastic workshops and careers guidance from organisations such as Innovate UK, GSK, GE, Tech Partnership, Rolls Royce and more.

The unique feature of this course is that students are able to access content from a diverse range of STEM subjects and will be able to tailor a course that suits their interest.

On successful completion of the course, which involves 30 hrs of study, students will receive a Silver Industrial Cadets award and be in a position to make a more informed decision for their UCAS application.

Humairaa Saleh

Level 4 Software Developer BAE Systems Digital Intelligence

I joined BAE Systems two years ago as a Level 4 Software Engineer apprentice straight after completing Sixth Form where I studied A-level Maths, Physics and Further Maths. While I had no previous technical experience or qualifications, I spent time after school learning on code academy and competing in cyber competitions, which ignited my interest in tech.

During Sixth Form there was a lot of emphasis on going to university. I knew early on that this wasn't something I wanted to do. I wanted to learn on the job and get hands on experience I could apply my education to.

I originally wanted to go into Cyber Security, and admittedly software engineering wasn't something I had considered until I saw an advert for BAE Systems National Security Academy which was local to me in Gloucester. I was attracted to the scheme by the work the business does in national security which helps to make the UK safer and more prosperous.

What does your apprenticeship mean to you?

My apprenticeship is my pathway into the working world without having to go to the 'traditional' university route. I get the best of both worlds as secure technical knowledge for my job without having to sit in a classroom and commit for the length of the Degree but I'm still able to thrive and progress in my career. My learning has been delivered through a 14 week virtual bootcamp as well as on the job.

What advice would you give to someone wanting to apply for an apprenticeship?

I would recommend that anyone about to take that first step out of education nurtures their LinkedIn profile. Having one helped me to find different roles and for recruiters to see my skills and interests, while starting to build a network. Do things in your free time that relate to your aspirations. I spent some of my free time learning with Immersive Labs, code academy and I competed in cyber competitions at school, which gave me the first-hand experience that inspired me to pursue a career in technology which was well received in interviews.

BAE SYSTEMS

“Apprenticeships are for everyone! I started alongside 20 other apprentices, all from different backgrounds and of varying ages”

What does a typical day look like for you?

A typical day for me starts off by getting in the office at 7am. The perks of flexible working means that I can start my day early and finish early. I begin by checking my emails and review any open pull requests (the code of the other developers on my team). Once my team are all in, we have a 'Stand up' which is where we all get together and discuss what we did yesterday, what we are going to do today and any bugs that we may have encountered. Following this, I start working on my tickets ensuring that I work through all the stages of the Software Development Lifecycle. The languages I tend to code in are Python and JavaScript. I am also required to attend other meetings which relate directly to my work along with other colleagues. My days follow a similar routine, but the tasks I work on are quite different and challenging (which I enjoy).

Work Experience Week 2024 Information + application process

What is Watershed's work experience programme 2024?

For this year's work experience programme, we are inviting a group of students to join us in the Pervasive Media Studio for one week, where they will work together in teams to design and prototype an immersive experience, which they will showcase at a sharing event at end of the week.

For us 'Immersive experiences' mean art or tech projects which use technology in some way to connect the audience to the work, generally in an interactive way.

Immersive art projects often involve film, audio, projections, mixed reality, VR, music, but can include lots of different things. The projects you make will depend on the skills and interests of the teams you form. Don't worry if you haven't heard of immersive experiences before, we will explore what they are together.

You can find out more about Watershed [as a Cinema](#) and [a centre for creative technology](#) on our website.

Who is this for?

Building an immersive experience requires people with a wide range of interests inputting their skills. It might be that you're really interested in drawing and take a lead on storyboarding or graphic design for your project, or it might be that you're really into short film, or robotics and want to bring elements of that into the prototypes you build over the week.

Some areas of interest might include:

- Design/Illustration/Drawing
- Creative/Copy writing
- AR/VR/XR
- Screen based media
- Sound technology
- Creative Producing/Project Management
- Comms/Audience Development
- Games/Video Games
- Other types of creative technology
- Other creative practices

We are excited to hear from people who are excited by creativity in all its forms particularly around art and/or creativity, although you don't have to call yourself 'a creative' either!

DEGREE

BA (HONS)

BA TECHNICAL THEATRE ARTS

A fast track to work in the production arts industry, based at Tobacco Factory Theatres.

[APPLY FOR INTERVIEW](#)**BRISTOL**

UCAS Code: TTA1

Duration: 2 years full time*

Start date: September 2024

Location: Tobacco Factory Theatres

- Capped at 12 students so you work as a real production team in a working theatre.
- Intensive training in stage management, lighting design, sound design and theatre technology.
- Collaborate with teams of designers, performers, technicians and artists.
- Career preparation for work in theatre, with extensive transferable skills for the live events industry.

This new fast track degree, taught by industry professionals, gives you a two year route into the theatre production industry whether in stage management, lighting, sound or AV, in theatre, festivals or events. Based at Tobacco Factory Theatres in Bristol, you are at the heart of a working theatre, experiencing life as a technical theatre artist from day one.

It is limited to just 12 students so as to re-create a professional working environment and culture from day 1. There is a national shortage of skilled technical staff in the theatre and live events industries. Technical Theatre Arts Graduates are in high demand and BSA's strong industry networks can help open doors to a rewarding career.

BA Technical Theatre Arts is an intensive, accelerated degree taught over two years, with 40 weeks of teaching per year. You receive the same number of teaching weeks as you would on a three-year course, but save at least £5,000 in tuition fees plus a year of living costs.

*course subject to validation

Bristol School of Acting are launching a new Technical Theatre BA (2 year accelerated course) starting in September and being taught in the Tobacco Factory.

It's a really exciting course for those who are interested in the technical elements (lighting, sound, projection, SFX etc etc) and the industry is SO under subscribed, chances of employment following the degree is really high!
